

NEXTFIELD

A living index of projects, notes and experiments.

POSITION

把 AI 能力，变成真正好用的产品。

I connect Agent architecture, interaction states and production engineering - from the workflow beneath the surface to the interface people can understand and control.

SELECTED SYSTEMS

01

Knowledge Copilot

Cited retrieval, tool use and recoverable workflows.

02

Agent Operations

Observation, debugging and evaluation for complex runs.

03

Semantic Search

Intent-aware retrieval over structured business data.

EVIDENCE

AGENT PRODUCT

State graphs, tools, confirmations, recovery paths

FULL-STACK

Next.js, TypeScript, MDX, static production delivery

INTERACTION

GSAP, Canvas, spatial feedback, accessible fallbacks

EVALUATION

Failure categories, traces, explicit evidence links

WORKING PRINCIPLES

01

Content before decoration

02

Motion with an exit

03

Build, observe, refine
